Solubility of Some Common Ionic Compounds in Water at 298.15 K

**Note:** This solubility table is only a guideline that is established using the  $K_{sp}$  values. A concentration of 0.1 mol/L corresponds to approximately 10 g/L to 30 g/L depending on molar mass.

Element	Symbol	Colour		
lithium	Li	red		
sodium	Na	yellow		
potassium	Κ	violet		
rubidium	Rb	violet		
cesium	Cs	violet		
calcium	Ca	yellowish red		
strontium	Sr	scarlet red		
barium	Ba	yellowish green		
copper	Cu	blue to green		
boron	В	yellowish green		
lead	Pb	blue-white		

## **Flame Colour of Elements**

**Note:** The flame test can be used to determine the identity of a metal or a metal ion. Blue to green indicates a range of colours that might appear.
